### Indo- French Workshop on Collaborative Automotive R&D

#### Event Contacts

#### Event Description

The objective of the workshop is to promote Indo French R&D in Automotive Sector, where it aims to bring together France & India so that at the end of the seminar, we have projects involving an Indian/French research organisation specific theme or topic and willing to enter into partnership for technology development with research institutions.

In addition, it aims to identify projects for funding through Indo French Bilateral R&D Fund.

It also attempts to promote exchanges of academics and students between the countries to further foster the deve

The possibilities of collaboration are:

- Indian and French research institutions establishing joint research programmes of interest to their respective R&I environments.
- Indian industry interested in a specific technology and willing to collaborate with French & Indian research institut
- French industry interested in collaboration with Indian industry and French institution for development of a specifi
- Indian/French industry, collaborating with Indian/French institutions for translating the R&D lead from the institutic
- French/Indian industry which has already developed the generic technology transferring the technology to a user application.
